[Article Writing Tips](#)

1

You have the right To **Give** this report on your website, your e-zine. You can sell it on ebay or sell it on Auction Sites.

You **Do Not** have the right to change it in any way.
Thanks.

Introduction

In this report, you learn why you should write articles, and actually how to do it the right way.

This report will be constantly updated, and if you need to have my latest experiences and tips on article writing, just visit and let your first name and email address here: [Article Writing Tips](#)

You will also learn how to write an ebook like this one. It's easiest than you think.

After reading this report, you will be able to write your first article, and publish it to hundreds of article directories, e-zines (Newsletter) and announcement groups.

It is the first online marketing that I learned, and it bring me hundreds of dollars. I was stuck when I made more than \$400 in 2 months, and got almost a hundred subscribers with only a couple of articles that I submitted manually to less than a hundred article directories.

What is even more amazing is that it was my first hand made website, and my first articles were not that good...

I knew that I was on a winning strategy, and I decided to take it to the next level.

So put your heart into that, and you will succeed. Don't procrastinate and take massive action.

I want this report to be short, and to the point; just what you need to

succeed.

What is article marketing

Article Marketing is a very effective advertising technique. You will be seen as an expert in your niche and get more exposure on the Internet, and you will gain in credibility.

When people see one of your recommendations or products, they will probably search for you on Google or another search engine (I do it all the time), and when they see that you actually wrote hundreds of useful articles on your subject, they will start to trust you.

When you submit an article to places which accept free articles, you will be granted a resource box (with a link to your website, blog or other websites), and the reader will be able to click on your link to find more informations about what he read in your article.

Webmasters will publish your articles and archive them on their websites, that will guarantee a long and steady traffic to your websites.

More Traffic = More sales

Also, your search engine ranking will be favorised because of all the one way links pointing to your website.

What are the possibilities with article marketing?

- Promote your products
- Send visitors to your blogs
- Send visitors to your adsense sites
- Send visitors to your affiliate programs
- Build your opt-in list
- And much more...

Why Should You Start Writing Articles ASAP?

If you are not advertising your business with article marketing, you are losing a lot of traffic and sales.

Anyone can start to write articles today. It is not difficult, and you just need to take action.

I am sure you already heard that “Content is King” on the web. It is one of the most intelligent statement I've heard about the Internet, because the surfers are searching for informations, informations and... Informations.

They want a solution to their problem, and by writing articles, you can give them what they are searching for, and they will want to know more about you or your services.

All the Internet can be resumed into one word: Content!

Give to surfers what they want, and you will succeed. Continue to read this report to find out how to cash in with articles.

If they find your free article valuable, they will visit your website, and think: “his paid product must over deliver, because What I've read so far was really helpful”.

This is how you will make sales.

Don't Let People Read Your Articles!

You don't want people to read your articles, but you want something better than that, read on...

What do you want? You do not want them to just read your article, but you want your readers to enjoy it, and have a real benefit from it. Something they can apply and see results. This will guarantee that they like your articles, and will your following products.

If they know that there is a benefit in the article, they will read it, and even bookmark it, send it to their friends, post them on forums, and it will become a “viral article”

You want them to love your articles, and take the action you want them to perform.

Now, you will learn the entire process...

How Does Article Marketing Works?

I will show you step by step the article writing process:

1. You write an article (or someone write it for you)
2. You proofread and spellcheck this article
3. You distribute it to article directories sites and ezine publishers
4. You make them click on your resource box
5. You send them to an affiliate page, your own products, or a squeeze page.
6. You send them follow up messages with your offers.
7. You wait for your commissions!

Step 1:

@ The Headline

You must write your article now. I do not know the theme of your product, so I will assume that you have an Internet Marketing Site.

The most important thing in your article is the headline. If your headline is not appealing, people will not click to read your article even if it is the best in its category.

So let's start rather than writing:

“How To Get More Traffic To Your Website” Which is an acceptable title: I wrote:

“The Surefire Way To Skyrocket Your Website Traffic!”

Note that it is exactly the same article, but this title brought me more visitors than the first one, just because it make you curious.

@ The First Paragraph

I will start know with the first paragraph: You want the reader to be curious, and read the rest of your article: You want to show him that he has a problem, or he is in trouble.

Happily, you cam with the solution to this problem! Do you think he will not continue to read? Aren't you reading right now because you want to know how to be more effective with articles?

You can start like that:

“Thousands of webmasters are struggling to drive traffic to their websites. Whether it is a business or hobby site, they need visitors who will reward them with money or insights...

There is a small thing that you can do to change that sad situation, and get ultra targeted visitors to your website in less than one month... And for Free!”

Now, the reader wants to know what's next, what is that solution?

So here come the body of your article:

@ The Body

There is some rules to respect when you write an article, and if you respect them, you will “guarantee” that people your article will be read.

- Writing for the Internet is different than writing in the “real world”

You should know that on the web, people are in a hurry and they don't have time to waste they are searching for something, and they want it fast.

Here are the Do and Don't of your article writing:

Do not do these, are the article strategy will fail:

- Write an advertisement for your product(s)
- Spelling Mistakes
- Affiliate links in the body of your article
- Exclamation mark all the time: !
- A Too hyped Resource box
- Write long blocks of paragraphs

Do these to be successful:

- Make your article interesting
- Write short paragraphs (2 or 3 lines)
- A Catching headline
- Get the point in the title and first paragraph (you have less than 10 seconds to grab their intention)
- Select your audience in the introduction (Note my headline and first paragraph: it's clear that my article is for webmasters who want to increase their traffic)
- Let white space in your copy
- Use bullets in your copy
- Target your article for one topic (drive the readers to what you want them to do at the end)
- write a good conclusion
- Write a bio box with your webpage URL (where you want them to go)

Let's see 2 real examples now...

2 Articles: Examples:

Article #1:

7 Days To Affiliate Marketing Profit Mastery!

1) This is a short summary: What you will get in the article:

Are you Struggling with your affiliate business? Discover how to become a super affiliate in seven days with a complete step by step affiliate marketing blueprint...

2) Here is the first paragraph:

Many affiliates are not making any money with the programs they promote, because they are simply doing a lot of mistake which prevent them to bring their affiliate marketing business to the next level.

3) Body of the article:

The right affiliate strategy can help you to make your first sale in one week, or more. It will depend of how much effort you put into the battle.

Follow these seven days to affiliate marketing profit, and you must do well, and see your first affiliate sale very soon. When I saw that blueprint for the first time, I was skeptical, but when I saw sales in my affiliate account, I knew that the process was working perfectly.

The problem is not in the process, but with the affiliate marketer who didn't set a plan, a clear goal and took action to achieve the success that many other super affiliates are enjoying.

So here is the plan that you must follow if you want to make your first commission in affiliate marketing... next week:

Day 1: Find a profitable market.

Finding a profitable is where most affiliates fail, and then give up. It's not their fault, but nobody take the time to explain that.

When you are starting, it is better to start with a huge market which is already profitable, like golf, weight loss, finance, self help, beauty, sports, fitness...

Start by researching what those people want, what they are searching for on the Internet. For that, you will need a keyword research tool like Goodkeywords.com or Yahoo search marketing tool.

Day 2: Find an affiliate product for this market

Before finding the product, try to identify the needs of your targeted market. Your chosen product must be excellent, and you want to have a good commission that will reward you, motivate you and cover your affiliate campaign costs.

You must verify the sales page to see if it will convert your visitors into sales.

Day 3: Know and understand your product

Know that the goal of the affiliate is top pre-sell, and not to sell. The merchant must sell his product, not you.

You should pre-sell (capture and warm up) your product to your subscriber. For that, you need to know the benefits of the product for your subscribers, and the best way to do that is to own the product.

Day 4: Prepare your advertising plan

Prepare your material: ads, articles, where you will advertise this affiliate program: Start with articles and pay-per-click traffic via Google Adwords.

Day 5: Prepare yourself to capture your prospects

You must not send your visitor to the merchant page, but you must capture his name and email address first, to secure your future affiliate commissions...

Day 6: Write your killer follow up material

After capturing his email address, the pre-written message in your autoresponder will do the work for you, and close the sale.

Day 7: Drive Tons of traffic to your lead capture page

When everything is ready, start to advertise your affiliate program. Actually, you will show your lead capture (also called opt-in or squeeze page) page to the world, and take your future buyer's email address, and one of the most effective way to advertise it is to write articles.

Here is the conclusion:

Remember: the affiliate marketing process works, and it is perfect. But it will not work without you. So take action, and when you start to see your affiliate commissions, you will know that it is working, and you will be able to master the affiliate marketing game and become a super affiliate.

Article #2:

5 Tips For New Internet Surfers.

When you are new to the web, and try to make a living online, you need advices to make your surfing life easier...

Everyday, new surfers open their browsers for the first time, it is confusing in the beginning, but if you have some good advices in the early beginning, you can surf easier and faster with a friendly browser...

Tip 1: Surf in security.

The first action that you will do if you are new to the net is to open your browser to surf. If you have a PC, like most of the Internet population. You will have Internet explorer installed in your computer, but it is not the best browser available on the net, and it is in fact limited. You may think that it is hard to surf on Internet.

When you will discover Mozilla Firefox, you will be even more happy to surf on Internet, for sure.

One of the first reason you should use Firefox is the integrated Firewall, which protect you against spyware and other adwares.

Tip 2: No need to tape <http://www.---.com> all the time.

The second reason to choose Firefox is that you save time; for instance, when you went on [ebay.com](http://www.ebay.com) yesterday, you wrote: <http://www.ebay.com> with Firefox, you just tape "e" in the address bar of your browser, then <http://www.ebay.com> will appear in the drop down menu, it's like magic, and it's fun too.

Tip 3: See all your pages in only one window.

I really love this one; you can surf in tab. That is really powerful.

For instance, with Internet Explorer, whenever you click on a link, you have 2 choice: open the page in the same window, or open it in a new window.

Firefox enable you to open several pages in one window.

Let's explain: you are now looking yahoo.com, and you want to see the news, you just right click on the link, select open in a new tab, and you have now two pages in only one window. To switch between your pages, you just need to click on anyone of the page you want to look in, all that in the same window. You can open fifteen windows in one time if you want.

Better, you can bookmark(in Internet explorer, bookmark is favorites) a tab, and open it later. It is a very intelligent way of surfing. It is very efficient when you are doing some researches on a subject, on google for example.

Tip 4: All your downloads at the same place.

The fourth reason to choose Firefox is that when you download a file on your computer, sometimes, you want to open it, but you face a problem: Where did you save that file? With Firefox, just click on tools, and then you select download, and a pop up window appear. You just scroll to find your program. It will save you time and a lot of headaches.

However, it is recommended, for the first time, to save your download on your desktop, then after save your file in the folder you choose. You can download firefox for Free. You just type firefox in google.com and you're done.

Tip 5: Don't forget a good anti virus

While you surf on Internet, some hijackers will attempt to damage your computer, by introducing a virus in it. If you don't take your precaution, you may loose all that is stored in your hard disk. You can download AVG, which is excellent at download.com.

There is a lot to learn when you start on Internet, but take your time. And everything will go smoothly.

About The Author:

Franck Silvestre is an active affiliate marketer who loves to teach others how to make money online. Learn how YOU can make a living with affiliate marketing when you visit: [Affiliate Marketing Blueprint](#). Visit The [Affiliate Blog](#) .

If I can do this, and get my articles published, you can too, I am sure. This article has been published on hundreds of websites, distributed to e-zines...

@ What if you don't like to write, or you don't have time?

Don't worry, you are not obliged to write if you don't have time or don't know the subject.

You can get the job done for you, and just put your name on it, add your bio box, and voila! Your article is ready for distribution.

Those people are called ghostwriter: they write articles for other people against a fee.

You can get the job done at <http://www.elance.com> , it will cost you \$5 per article.

Tips:

- Ask to have the exclusivity of copyright (you are the sole owner of the article)
- Ask for a preview of the ghostwriter's work
- ask to have 2 or 3 revisions. Like that, if you don't like the article, you can have it edited at no cost.

PLR (Private Label Rights) Articles.

You can also subscribe to a PLR Membership site, and get articles every month for less than a few cents each.

Here is an example of membership site:

<http://www.privatelabelmonthly.com/>

However You will have to rewrite them before you distribute them, because the article directories and publisher will not accept that hundreds of writers submit the same article!

Step 2:

@ Proofread it

Know that your brand new article is finished, and you are satisfied about your work, it must be proofed.

That means that it will be formatted by professional for the best presentation, and you will have more chance to see your article featured in the different e-zines and on websites and blogs.

They will just make basic changes to enhance the wording, they will spell check and correct the grammar.

It's a must do if you want to get published.

You will have to pay a small fee for that, so try to proofread your best articles.

You can get it proofed at <http://www.ideamarketers.com>

@ Spellcheck it

This can be done at: <http://www.spellcheck.net> , just follow the instruction to spell check it.

It's free, easy and will take you only two minutes. At least, if you can't get your article proofread, spell check it.

Step 3:

Now it's time to monetize your article.

You will distribute it to article directories sites, announcements groups, like yahoo and Google groups, and directly to ezinepublishers.

@ Distribute to Article Directories

You can distribute:

- Manually

This can take a lot of time. Up to 7 hours to distribute to 100 articles directories, if you are fast. IT can take more...

I took that route first when I started, I made money, but after sometime, I stopped because I just didn't have time.

Find article directories at the end of this report.

- With a software

I also have a software : Article submitter, it is faster, you will save a lot of time like that. You can submit to 100 article directories in 2 hours.

I use that method now, and the following one

- With an article submission service

This is the best choice. You got to pay, of course but every single dollar is worth it believe me.

You just enter your article, in less than 2 minutes, and they will submit it for you to hundreds of article directories, ezine publishers, and announcement groups.

You must outsource to progress in your business.

I submit with:

[Isnare Article distribution service](#)

[Article Marketer distribution service](#)

You can try them at no cost.

These are recommended resources by some Internet Marketers that I know:

[Submit your articles](#)

[ezine trendz](#)

These 2 services are good, and I know a lot of people who have good results with them, but they are more expensive than the first two options.

Step 4: Send them on a webpage: The Bio Box

Before we continue, I want to let you know that you are not only writing to help people, but you want to make some money too.

So for that, you need a bio box. It is the one at the end of your article:

Example:

About The Author:

Franck Silvestre is an active affiliate marketer who loves to teach others how to make money online. Learn how YOU can make a living with affiliate marketing when you visit: [Affiliate Marketing Blueprint](#). Visit The [Affiliate Blog](#) .

Just give to the reader one or two links where he can read more. If you wrote a good article, he will want to see what you got for him, and will click on the link.

What you should know about the Bio Box

Some websites will not allow you to put the text in HTML.

I mean : `Visit My Website` .

You will have to write like this: <http://www.YourURLHere.com>

The problem with that is that your website will not benefit from the one way link.

If the article directory allows you to put an anchor text with your keyword, do it.

Instead of writing:

Visit my Blogging website: <http://www.YourURLHere.com>

Write: Learn how you can [make money with your blog](#) .

This is what we call an anchor text. It will help the search engine to give more importance to your website, and it will have a higher rank for this keyword: “make money with your blog”

The bio box should be written at the third person, short and don't just put 4 or 5 URLs, just one or two will be fine.

Send them to a Squeeze Page (also called lead capture or opt-in page).

A squeeze page is a page that allow you to capture your visitors name and email address.

Why should you do that? Because if they are not interested the first time they come to your website, you will be able to remind them about your offers.

See an example of opt-in page: [Squeeze Page](#)

From there, once they sign up, you will be able to send your follow up messages with your different products.

You are just building your most important asset in online marketing: Your list.

Tip for the squeeze page: ask only for the first name, because after, when you will send your message, they will be personalized:

Hi, [First name],

The first name will automatically write your subscriber's first name (what he entered in the opt-in form)

So he will receive, when you send him a message:

Hi John,

All your subscribers will receive a personalized message with their first name.

Step 5: Wait for your sales.

See, nothing difficult! Now that you know the process, just repeat, and make more sales. That's it.

That's not all. The search engines will find one way links to your websites all other the web, and thus, give it more importance.

What's in it for you?

- Sales
- Subscribers
- Lifetime Traffic
- More Exposure
- Credibility
- More weight with the search engine

Article Marketing is wonderful. I like it, and you will too if you didn't start.

Article Directories List

Those article directories sites will give you the more exposure, and... the more potential sales. You should absolutely distribute to them first:

<http://www.ideamarketers.com>
<http://www.ezinearticles.com/>
<http://searchwarp.com>
<http://www.goarticles.com>
<http://www.isnare.com>
<http://www.articlemarketer.com>
<http://www.articlecity.com>
<http://contentdesk.com/index.php>
<http://www.articlehub.com/add.html>

<http://www.articledashboard.com/>

There is a lot of excellent articles too, you will find them other the time, depending on your topic.

Now, here is more article directories where you can submit to, if you choose to do that manually:

Here is a list of article sites and article announcement lists. You can start with this. I told you before that it is a hard work by hand...

You get the PR with the articles directories. Submit to the directories with high PR first.

You must organize yourself:

20 article directories/ day , or a day during the week specially for submission...

Source of this list: <http://www.articlepostrobot.com/SiteLists.htm>

(I do not know about this service, article post robot.)

Article Title	Views	EzinePublisher
GRAND TOTAL:	3,689	86

As you can see, this is my ezinearticle.com control panel.

Do you see the articles at the top, with 33 views? The article is live since 2

days only, and already 9 publishers downloaded it.

Above View, it is the number of people who saw my articles, only on ezinearticles website (my articles are now on hundreds of blogs and websites).

Some ezine publishers also downloaded my articles (that doesn't guarantee that they will send them in their newsletter).

Think about that: a publisher send your article to e-zine subscriber list of 1000, 10000 or 50000. How many visitors you will get to your site?

And you can have thousands of visitors all during the years with that technique only.

What To Do Now?

Know, just write an article an your subject topic (come backe from the beginning of the document, and follow all the steps).

Then submit it to one of the best directories. Just follow the instructions on the article sites.

You will need to register first (except for article city). It will take you some time in the beginning, but once you post one article to each of these sites, it will become really easy.

Do your homework now, and get those hungry buyers to your sites.

Ok, I show you now, Step by Step:

Here is the ezinearticle.com home page :

The screenshot displays the homepage of ezinearticle.com, featuring a sidebar with navigation links and a main content area with category lists. The sidebar includes sections for 'For Publishers', 'For Everyone', 'Search EzineArticles', and 'EzineArticles Newsletter'. The main content area lists categories such as Business, Health-and-Fitness, Internet-and-Businesses-Online, Cancer, and Finance, each with a list of sub-topics.

Article Title 

100 Characters left

Author Tools Help
Submit & Edit Your Articles.
Read about [Microsoft Word Smart Quotes](#) and learn why we avoid them. [Capture Rectang](#)

Then you will have to choose the category. The article title (headline)... You will have to choose the keywords too. It's really important, because people will be able to find your articles in the search engine according to the keywords.

A keyword is the word or sentence that the surfer tape in the address bar of his browser. Let's say you are searching for pitbulls in germany. You will tape: "pitbull in germany" those three words are one keyword.

To find your keywords, you may use Yahoo search inventory service:

<http://inventory.overture.com/d/searchinventory/suggestion/>

Ok, let's enter our keywords now... Don't forget to separate them by a comma!

You can listen by clicking on the red button too if you want.

Keywords (Comma Separate Please - keyword1,keyword2,keyword3,etc.) 

100 Characters left

Abstract/Article Summary/Teaser Copy (2-5 sentences please)

Article Body 

Allowable Tags:
 <i> <u>
 <pre> <blockquote> <xmp>
Advanced Users: To use our WYSIWYG editor. Select 'Account Manager' & change your 'Account Preferences'.

Capture Rectan

After your keywords, your article body:

Article Body
